

Master table for customer

Wallet recharge history for customer

Master Table for Menu items

For daily changing menu

Cart with List<Items>

Order with 1 cart + payment + transaction_id +
#items served by canteen + is_total_order_complete

1. If razorpay api to be implemented, no need for saving cards/upi details. Taken care of by razorpay.
2. If splitwise api to be implemented, need to add one more table with "groups" of customers.
3. For admin/manager order history, skip transaction_id, payment_method. Rest order, cart table same as above.
